North West College

ABOUT NORTH WEST COLLEGE

- NWC has two main campuses, one in North Battleford and one in Meadow Lake.
- Our Meadow Lake campus operates a fully furnished, student residence. The [residence](#) consists of 40 units or 96 beds available for our current and potential students. Living at our residence provides a safe space for students, and eliminates barriers of finding affordable housing while attending NWC.
- We offer a unique campus setting where exceptional instructors and supportive staff help to make your educational experience a success. Small class sizes ensure that our students get the most of their education, and allows us to provide one on one attention and support when necessary.

- At North West College, we strive to build a supportive and fun learning environment. Our Student Services Team offer a variety of activities for students throughout the academic year. Student Services Associates are here to help address any barriers you may have while attending our college. If you need any information on financial resources, child care, transportation, housing or any community resources, our Student Services team are here to help you.
- NWC also provides Educational Resource Services for our students. We want to see you success! The goal of the ERS team is to find ways to accommodate learning for students, in spite of a limitation or barrier. Confidential support and encouragement are provided to all students who contact the ERS department.

- The Bachelor of Social Work program will be offered from both locations, with the anticipation of a blended learning environment that hosts both in-person and virtual classes. This model provides an optimal learning environment, while also allowing some flexibility should unexpected life events occur.
- Our BSW program will have 30 of seats available at both campus locations. With the exceptional interest in this program, we are hopeful we can fill the seats. If you are considering applying, I would encourage you to do so early!
